## What is Ayurveda?

Ayurveda, a natural system of medicine, originated in India more than 3,000 years ago. Ayurveda means Knowledge of life. Based on the idea that disease is due to an imbalance or stress in a person's consciousness, Ayurveda encourages certain lifestyle interventions and natural therapies to regain a balance between the body, mind, spirit, and the environment.

Ayurveda is based on ancient writings that rely on a natural and holistic approach to physical and mental health. Ayurvedic medicine is one of the world's oldest medical systems and remains one of India's traditional health care systems. Ayurveda medicines are prepared and developed between 2500 and 500 BC.

The concepts of universal interconnectedness, the body's constitution (prakriti), and life forces (doshas) are the primary basis of ayurvedic medicine. Goals of treatment aid the person by eliminating impurities, reducing symptoms, increasing resistance to disease, reducing worry, and increasing harmony in life.

Ayurveda literally means "The Science of Life" and it represents the Oldest Complex Medical System of "Healthy Life Principles" and focussed on views of man and his illness.

# Basic Doctrine & Principles of Ayurveda

Ancient Indian sages believe that the entire universe is composed of Five Elements:

1. Vayu (air),
2. Jala (Water),
3. Aakash (Space),
4. Prudvi (Earth) and
5. Teja (Fire). These five elements are called PANCHAMAHABHOOTA in Ayurveda.

The origin of ayurvedic teachings and medicines date back to the ancient times. The three humours Vata Deosha, Pitta Dosha and Kapha Dosha are collectively called Tridoshas.
